

# NEW FLAKE-SHAPED ZINC OXIDE

## MZF-01

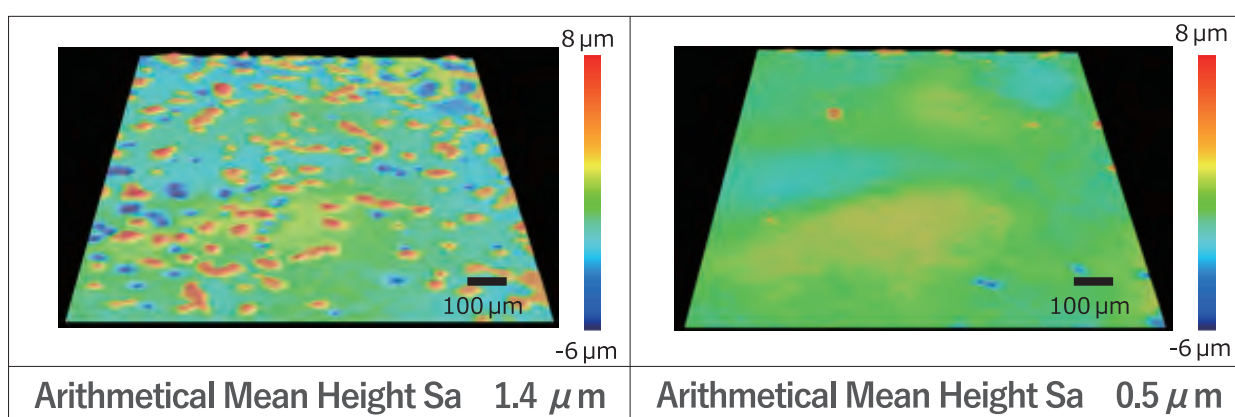

This product is zinc oxide that has been controlled to have a flake shape. This shape provides a smooth texture, allows for easy spreadability on the skin, effectively protecting against UV rays.

Grade	Shape	INCI	Natural Origin Index
MZF-01	Flake	ZINC OXIDE TRIETHOXYCAPRYLYLSILANE (We respond to various requests)	0.95

### SEM Images

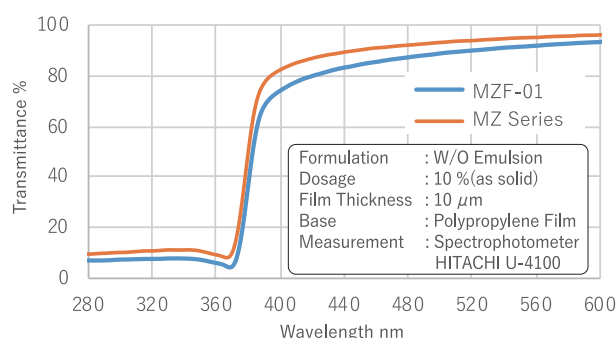

### Coating Film Condition

The powder is dispersed into dimethicone to achieve a 10 % concentration, then coat the film using a bar coater. The coating film is then observed under a laser microscope (VK-X 1000).

### Transmittance Curve

### Coefficient of Kinetic Friction
